PROFESSIONAL SUMMARY

Self-taught Full-Stack Developer building modern web applications from frontend to backend. I focus on clean architecture, intuitive user experiences, and performance-driven software while continuously strengthening my problem-solving skills through real-world projects and 130+ LeetCode problems.

PROJECTS

NOVA — Full-Stack E-Commerce Platform

React • Redux Toolkit • RTK Query • Tailwind CSS • Node.js • Express.js • MongoDB • Mongoose

[Live Demo](#) | [GitHub](#)

- Designed a modular architecture with clear separation between frontend, backend, API, and database layers, making the application easier to maintain, extend, and debug.
 - Developed secure REST APIs with JWT authentication and role-based authorization to support products, users, orders, reviews, and shipping workflows.
 - Engineered the complete commerce workflow by integrating product discovery, cart management, checkout, shipping, payment, stock validation, and order lifecycle management into a consistent purchasing experience.
 - Built reusable React components and managed server state with Redux Toolkit and RTK Query to improve maintainability, simplify data fetching, and deliver a responsive user interface.
 - Optimized frontend performance through responsive image delivery, lazy loading, code splitting, and continuous Lighthouse-focused improvements before deploying the frontend on Vercel and backend on Railway with MongoDB Atlas.
-

Developer Portfolio

React • Tailwind CSS • Vite

[Live Demo](#) | [GitHub](#)
